I.S. buffer unit

■ ODA-1371-1AH
I.S. Wall Type Auto Telephone with headset

Based on rich experience and concrete achievements in developing marine internal communication systems, we foresee necessary functions and create new networks.

A variety of telephone sets are built sturdy based on the design to achieve high reliability while also meeting all the requirements for the marine telephone sets to be connected with the marine electronic telephone exchange. It is very reliable, easy to operate, with various functions incorporated, thus supporting the ordinary communication tasks on board the ship.
